Title	Date	Pages	Author
The Procurement Outsourcing Benchmark Report	March, 2004	49	Tim Minahan
The <i>Procurement Outsourcing Benchmark Report</i> will help business executives assess the maturity and competency of their procurement operating model and identify how procurement outsourcing may help.			
The Trade Promotions Benchmark Report: Pouring Money into a Leaky Bucket	March, 2004	47	Chris Jones
This Aberdeen report examines the increased spending in trade management technologies and how the expectations for these solutions match their effectiveness. In addition, it gives readers a clear understanding of how their companies compare with their peers in terms of trade promotion.			
RFID in the Consumer Industries: Being a Winner, Not a Follower	March, 2004	38	Tom Ryan
This report offers manufacturers insight into how their peers are implementing RFID technologies and provides them with a competitive framework to find out their position in the industry.			
The Category Spend Management Report Series 2004: Report No. 1: Contract Labor	March, 2004	43	Christa Degnan
This report, the first in a series of reports that will discuss category spend management strategies for business services, documents the drivers, strategies, enablers, and technologies (DSETS) of the rise of category spend management for contract labor.			
Business at Risk: Is Employee Performance Management the Antidote?	March, 2004	44	Dr. Katherine Jones
<i>Business at Risk: Is Employee Performance Management the Antidote?</i> is the result of an international end-user survey conducted in the winter of 2004. The 315 respondents from 49 countries were members of the Brainbench, the Synogy Performance Management, and the Aberdeen online communities.			
An Assessment of IBM's Enterprise Linux Strategy: An Update	January, 2004	45	Bill Claybrook
This report, <i>An Assessment of IBM's Enterprise Linux Strategy: An Update</i> , demonstrates the areas in which IBM is tackling some of the soft spots that previously concerned Aberdeen.			
IT Buyer's Guide to Security Currency Solutions - 3rd Edition	January, 2004	104	Eric Hemmendinger
The <i>IT Buyer's Guide to Security Currency Solutions - 2nd Edition</i> is a handbook for IT buyers who must get ahead and stay ahead of problems posed by a tidal wave of security vulnerabilities across desktops, servers, network devices, and applications.			
Services Execution and Control Market Analysis	January, 2004	67	David Hofferberth
<i>Services Execution and Control Market Analysis</i> examines changes in the services market and how they are affecting the development of integrated enterprise solutions. Changes in the services economy, ranging from increased financial scrutiny to overseas outsourcing to changes in how services organizations operate, dictate that the types of solutions and the people who use them are changing.			
Uses of Streaming and Digital Media	January, 2004	70	Michael Hoch
This report provides concrete statistics on the streaming and digital media uses and preferences for audio or video content, inside or outside an application, delivered live or on demand. This research is a statistically significant benchmark for readers to understand the current usage of business and personal applications.			
Storage Execution in a Time of Scarcity	December, 2003	49	David Hill
This Aberdeen Research Report, based on a survey conducted by Aberdeen Group in conjunction with <i>InfoStor</i> magazine, looks at how organizations are managing their storage infrastructure within current financial constraints.			
New Directions in Risk Management, Electronic	December, 2003	178	Jim Hurley

Safeguards and Protection Systems			
This Aberdeen report, <i>New Directions in Risk Management, Electronic Safeguards, and Protection Systems</i> , shines a spotlight on the intimate relationship between business risk, IT operations risk, and new transformational approaches to electronic safeguards and security systems.			
Enterprise Incentive Compensation 2003: Buyer's Guide for Variable and Total Compensation	December, 2003	113	Katherine Jones
Variable compensation is one of the most effective levers for aligning employee performance with business goals. Find out which enterprise information management system is appropriate for your enterprise.			
Mainstream CRM: Through the Lens of the Partner Channel	December, 2003	35	Karen E. Smith and Christopher Fletcher
<i>Mainstream CRM: Through the Lens of the Partner Channel</i> , an Aberdeen Research Report produced in conjunction with CRN, highlights the strategic importance that the partner channel places on the value and importance of CRM solutions today.			
Services Execution and Control: Solution Buyer's Guide	October, 2003	81	R. David Hofferberth
Aberdeen's new report, the <i>Services Execution and Control: Solution Buyers Guide</i> , is designed to help decision makers narrow their choices to select a solution that best meets their work and organizations' needs.			
Database Buying Guide (Fifth Edition)	October, 2003	177	Wayne Kernochan
<i>The Database Buying Guide</i> , an Aberdeen research report, examines the state of the market for database technology that allows developers to create applications operating on large quantities of data, and end users to access that data.			
Converging on a Successful Multichannel Retail Model	October, 2003	92	Kent Allen
This Aberdeen Research Report, <i>Converging on a Successful Multichannel Retail Model</i> , analyzes the impact of IT trends on the evolution of multichannel merchandising strategies and on the product distribution channels through which retailers execute these strategies.			
The Growth of an Industry: Enterprise Talent Management 2003	October, 2003	155	Katherine Jones
<i>The Growth of an Industry: Enterprise Talent Management 2003</i> demonstrates that corporations may continue to face employee cutbacks, but forward-thinking companies are looking at systems they will need to hire better candidates more efficiently when economy shifts.			
Service Parts Management — Unlocking Value and Profits in the Service Chain	September, 2003	46	Tim Minahan
This Aberdeen <i>Research Report</i> quantifies the revenue, performance, and profit opportunity inherent in service parts management; benchmarks existing corporate procedures for managing aftermarket service operations; and identifies strategies for maximizing services parts management.			
Buyer's Guide to Multifunction Networking and Security Solutions - Second Edition — New Approaches for Optimizing and Securing Application Delivery over IP Networks	September, 2003	122	Eric Hemmendinger and Michael Hoch
<i>The Buyers Guide to Multifunction Networking and Security Solutions</i> shows the key aggregation points in the network where IT buyers can get the most performance and security functions for the least cost.			
Enterprise Linux Strategy	September, 2003	21	Bill Claybrook
Hewlett-Packard and Sun are approaching enterprise Linux in unique ways. These two reports provide a high-level view of HP and Sun's strategies and cast them in a relevant context for IT executives. What's more, these reports examine at how the two companies will continue to pursue their Linux strategies in the future, and how market events could affect them.			
CRM and the Insurance Industry -- Room for Growth	September, 2003	36	Denis R. Pombriant
<i>CRM and the Insurance Industry -- Room for Growth</i> shows how traditional attitudes about application software are changing.			
Enterprise Service Automation: Agile Performance in Volatile Times	September, 2003	22	R. David Hofferberth, P.E.
<i>Enterprise Service Automation: Agile Performance in Volatile Times</i> , an Aberdeen Research Report, finds that Enterprise service automation (ESA) solutions give executives visibility into business process and capital, and reveal improvement areas affecting profitability.			
The Enterprise Asset Management Benchmark Report -- Maximizing Value in What You Own	September, 2003	41	Mark Vigoroso

Hosted CRM Popularity Continues to Grow -- But How Far Will It Go?	September, 2003	20	Denis R. Pombriant
--	-----------------	----	--------------------

Hosted CRM Popularity Continues to Grow -- But How Far Will It Go? serves up fresh findings on how IT managers view CRM today

The Outsourced Customer Contact Center -- Key Findings in Global Contact Center Outsourcing Services: 2003-2004	September, 2003	25	Christopher Fletcher
---	-----------------	----	----------------------

The Outsourced Customer Contact Center to see continued growth over the next decade

The Global Trade Management Benchmark Report -- Navigating the Currents of International Trade	July, 2003	45	Mark Vigoroso
--	------------	----	---------------

Global Trade Management Benchmark Report: Companies that "go offshore" must be mindful of the complexities inherent in international trade

Enterprise Information Integration — The New Way to Leverage E-information (Second Edition)	July, 2003	117	Wayne Kernochan
---	------------	-----	-----------------

IT cost savings can equal strong competitive advantage, according to the second edition of *Enterprise Information Integration — The New Way to Leverage E-information (Second Edition)*.

Technology Forecasting Consortium -- Second Quarter 2003 User Buying Intentions Update	July, 2003	42	Hugh Bishop
--	------------	----	-------------

Over the next 6 to 12 months, companies are expected to increase their technology budgets by an average of 3.4%, according to a recent survey of CIOs and other IT purchasing decision makers. The survey was performed in May and June 2003. This 3.4% increase represents an improvement since the last time this survey was conducted in January 2003.

E-channel Awareness: Usage, Satisfaction, and Buying Intentions	June, 2003	35	Guy Creese
---	------------	----	------------

E-channel Awareness: Usage, Satisfaction, and Buying Intentions helps business and IT managers understand Web analytics usage and satisfaction in detail

Software Development in Russia - A Buyer's Guide to the Russian Software Development and Services Export Industry	June, 2003	77	Stephen Lane
---	------------	----	--------------

Buyer's Guide to Software Development in Russia - Outsourcing IT to a highly skilled science, math, and engineering talent pool at a comparatively low cost

Worldwide CRM Spending -- Forecast and Analysis 2002-2006	June, 2003	57	Hugh Bishop
---	------------	----	-------------

Worldwide CRM Spending -- Forecast and Analysis 2002-2006 reports a massive shift in how companies will acquire and pay for CRM solutions is underway.

The Small and Middle Market Enterprise: Addressing Today's Business Issues Through Technology	May, 2003	125	Dr. Katherine Jones
---	-----------	-----	---------------------

The Small and Middle Market Enterprise: Addressing Today's Business Issues Through Technology looks at companies that provide software to the middle market, as well as information from the customer base those companies address.

Identity Management Systems Buyer's Guide: Second Edition	April, 2003	210	Jim Hurley
---	-------------	-----	------------

Digital IDs, user provisioning, federated systems, and personally identifiable data come together in the *Identity Management Systems Buyer's Guide*, a comprehensive overview of technologies and business drivers crucial to corporate livelihood.

Total Telecom Cost Management: An Aberdeen Enterprise Buyer's Guide	April, 2003	74	Dana Tardelli and Christa Degnan
---	-------------	----	----------------------------------

In this report, *Total Telecom Cost Management: An Aberdeen Enterprise Buyer's Guide*, Aberdeen explores trends in telecommunications services spending in the market today and examines efforts to optimize this considerable category of indirect spend.

The Customer Contact Center: Technology, Trends, and Investment Plans, 2003 - 2004	April, 2003	54	Christopher Fletcher
--	-------------	----	----------------------

Aberdeen zeroes-in on how executives in a range of industries perceive the role of their contact center in the research report, *The Customer Contact Center*:

What Works — Ten Significant CRM Implementations 2003	April, 2003	96	Denis Pombriant, Harry Watkins, Karen E. Smith, Kent Allen, and Christopher Fletcher
---	-------------	----	--

A mosaic of different industries, companies, vendors, business problems, and solution approaches — *What Works — Ten Significant CRM Implementations 2003* showcases the top ten CRM implementations of the past year.

Buyer's Guide to Managed Delivery	March, 2003	106	Michael Hoch
---	-------------	-----	--------------

Systems that guarantee the delivery of data, content, and applications enable companies to get more value out of their networks, according to the *Buyer's Guide to Managed Delivery*.

CRM Spending and Satisfaction Report	March, 2003	16	Denis Pombriant
--	-------------	----	-----------------

Spending for customer relationship management (CRM) solutions slowed noticeably in 2002. This report was developed to inquire into whether spending would remain flat, increase, or decrease during 2003.

Marketing Under Siege - Survey 2002 Report	March, 2003	38	Hugh Bishop and The CMO Council
--	-------------	----	---------------------------------

Required reading for CMOs, this report provides direct insights into the current health of high-tech marketing and provides a prognosis for 2003.

Web Services Development Solutions Buying Guide (Fourth Edition)	March, 2003	129	Wayne Kernochan
--	-------------	-----	-----------------

In *Web Services Development Solutions Buying Guide (Fourth Edition)*, we cut through the hype and explain what IT executives should focus on when evaluating and buying development tools and services that create Web services.

Technology Forecasting Consortium: 2003 User Buying Intentions	March, 2003	45	Hugh Bishop
--	-------------	----	-------------

Enterprises are expected to increase their technology budgets by an average of 2.7% over the next 6 to 12 months, according to a recent survey of CIOs and other IT purchasing decision makers. Data highlighted in *Technology Forecasting Consortium: 2003 User Buying Intentions* is based on a recurring survey of IT executives in the Technology Forecasting Consortium (TFC), Aberdeen's advisory council that assists in the early identification of trends in the IT market and the prediction of IT buying intentions.

Wireless Enterprise Messaging in Western Europe	March, 2003	47	Dana Tardelli
---	-------------	----	---------------

By 2006, 37.5 million professionals in Western Europe will be dependent on wireless messaging, according to Aberdeen's report, *Wireless Enterprise Messaging in Western Europe*.

What Works in Professional Services Automation: Ten Case Studies That Show How to Successfully Select, Deploy, and Optimize Organizational Performance Through PSA	February, 2003	116	David Hofferberth and Wayne Goodreau
--	----------------	-----	--------------------------------------

This *Research Report*, one in a series of comprehensive reports covering the PSA market over the past four years, is the first to fully examine ten successful PSA implementations.

What Works: Best Practices in Marketing Technologies	February, 2003	200	Kent Allen, Karen Smith, and Harry Watkins
--	----------------	-----	--

This Aberdeen *Research Report* supports numerous other recent studies that reveal that marketers are increasingly turning to digital direct marketing technologies and Internet-based marketing solutions as the fulcrum upon which successful multichannel, multimedia marketing strategies will rest.

Best Practices in Expense Management Automation (EMA) - A Covert Cost-Saving Opportunity	January, 2003	73	Christa Degnan
--	---------------	----	----------------

Best Practices in Expense Management Automation highlights successful EMA implementations and strategies, documents selection criteria, and quantifies the benefits of these technologies for IT and business executives.

Worldwide Enterprise Business Integration Spending, Forecast and Analysis 2002-2006	January, 2003	42	Tom Dwyer
---	---------------	----	-----------

The Aberdeen Research Report, *Worldwide Enterprise Business Integration Spending, Forecast and Analysis 2002-2006*, provides a clear understanding of the real opportunities and forces influencing the growth of the EBI market and how it will evolve through 2006.

Worldwide IT Spending 2003-2006: Measuring the Incremental Recovery	December, 2002	41	Hugh Bishop and Wyeth Lynch
---	----------------	----	-----------------------------

The Aberdeen Research Report, *Worldwide IT Spending 2003-2006: Measuring the Incremental Recovery*, breaks out spending for software, hardware and

professional services for five geographic regions. Additionally, the report provides individual forecasts for 22 countries.

An Assessment of IBM's Enterprise Linux Strategy	December, 2002	41	Bill Claybrook
For his new report, <i>An Assessment of IBM's Enterprise Linux Strategy</i> , Aberdeen's Bill Claybrook conducted extensive interviews inside IBM, as well as with Independent Software Vendors (ISVs), to produce the first critical look at IBM's Linux strategy.			
Worldwide PLM Spending (From the Engineering Perspective) Forecast and Analysis 2001-2005	December, 2002	47	Jack Maynard and Wyeth Lynch
Worldwide spending on product lifecycle management (PLM) technology — which helps manufacturers make improvements in product innovation and quality and speed up time-to-market — is expected to increase from \$3.38 billion in 2001 to \$5.12 billion by 2005.			
Financial Services Industry: Technologies Used for Streamlining the Extended Enterprise	November, 2002	121	Fran Howarth
<i>Financial Services Industry: Technologies Used for Streamlining the Extended Enterprise</i> examines live implementations by financial services firms. This Report is one of a series from the Aberdeen Group that examines the use of supply chain, demand chain, financial value chain, and enterprise infrastructure in different vertical industries.			
What Works: Ten Significant Mobile Data Deployments	November, 2002	62	Isaac Ro
<i>What Works: Ten Significant Mobile Data Deployments</i> offers profiles of what Aberdeen deems the most significant mobile data deployments of the past year.			
What Works: Ten Significant Implementations in Call and Contact Centers	October, 2002	74	Christopher Fletcher and Stephen Lane
Ten customer contact centers that have successfully integrated new CRM-centric solutions are highlighted in <i>What Works: Ten Significant Implementations in Call and Contact Centers</i> , which looks at IP CCs, customer experience management (CEM), and workforce optimization tools to focus on effectiveness.			
Database Buying Guide (Fourth Edition)	October, 2002	143	Wayne Kernochan
This <i>Report</i> , the newly-revised fourth edition of Aberdeen's <i>Database Buying Guide</i> , includes in-depth profiles of the leading vendors in this market, including FileMaker, Gupta, iAnywhere, InterSystems, IBM, Microsoft, Oracle, Pervasive Software, Progress Software, Sybase, and TimesTen.			
Best Practices in Streamlining the Financial Value Chain: Top Seven FVCM Implementations	October, 2002	68	Andrei Arkhipov
Financial value chain management (FVCM) can help enterprises control costs and improve financial processes. <i>Best Practices in Streamlining the Financial Value Chain: Top 7 FVCM Implementations</i> , an Aberdeen Research Report, covers FVCM market segmentation and seven companies that have successfully implemented FVCM solutions.			
What Works: Ten Significant Implementations in Services Management	October, 2002	94	Christopher Fletcher and Karen Smith
<i>What Works: Ten Significant Implementations in Services Management</i> is Aberdeen's latest research in the areas of customer relationship management, services management, and customer service and support. It is a collaborative research initiative undertaken jointly by Aberdeen and the Association for Services Management International (AFSMI), the leading industry association for services management.			
IT Outsourcing: 2002 Spending Priorities and Trends	September, 2002	23	Stephen Lane and Wyeth Lynch
This Aberdeen <i>Research Report</i> , based on an end-user survey of IT outsourcing - ranging from traditional operations activities to offshore software development and maintenance services - found that approximately 74% of respondents spent 1% to 10% of their IT budgets on outsourcing, whereas the average for all survey respondents was 9.4%.			
Enterprise Talent Management: Sourcing, Staffing, Hiring 2002	September, 2002	186	Katherine Jones
This Aberdeen <i>Research Report</i> will interest internal and external recruiters, hiring managers, and consumers seeking software applications to facilitate their hiring practices. The research does not purport to cover every supplier of recruiting and hiring solutions; rather, it offers a representative sampling of approaches and types of solution available.			
Best Practices in Online Services Procurement (OSP)	September, 2002	76	Christa Degnan
Best Practices in OSP documents the selection criteria, implementation strategies, technology solutions, and process redesign initiatives these enterprises used for successful OSP deployment. Additionally, it quantifies the benefits that have resulted from these technologies and initiatives.			
Making E-sourcing Strategic From Tactical Technology to Core Business Strategy	September, 2002	42	Tim Minahan

This Aberdeen Research report examines the selection criteria, deployment strategies, experiences, and future plans of e-sourcing users across multiple industry sectors in the U.S. and EMEA markets.

What Works™: Sell-Side/Demand Chain Best Practices Empowering the Multichannel Buyer	September, 2002	133	Kent Allen
--	-----------------	-----	------------

This Aberdeen *Research Report* highlights innovative selling organizations that have demonstrated industry best practices in deploying Internet-based sell-side solutions that automate manual order management processes; cut the costs of sales; increase revenues by extending market reach; and optimize multidivision, multichannel branding and commerce initiatives throughout the customer-facing demand chain.

Technology Forecasting Consortium: 2002 User Buying Intentions - Update	September, 2002	42	Hugh Bishop and James Tsai
---	-----------------	----	----------------------------

2002 User Buying Intentions Update, an Aberdeen research report, reveals the underlying market dynamics that will influence IT buying decisions in the second half of 2002.

Worldwide Business Process Management Spending Forecast and Analysis (2001-2005)	September, 2002	37	Darcy Fowkes
--	-----------------	----	--------------

This *Research Report*, which defines the business and marketing factors driving the BPM market, shows that less than half of the market is represented by BPM supplier product revenues, consisting of 21 public and 15 private BPM suppliers.

Active eIRM: New Realities in Security for Managing Electronic Infrastructure Risks	September, 2002	104	Jim Hurley
---	-----------------	-----	------------

A new capability, the automation of security processes, is providing IT with the ability to automate customized security processes throughout the enterprise. The result, active electronic infrastructure management (Active eIRM) security, is a step in the right direction, especially for IT buyer who are perpetually overloaded and underfunded. This Aberdeen *Research Report* addresses these security issues.

Free, Abridged: Offshore Software Outsourcing Best Practices: Building Successful Relationships on a Diverse Delivery Model	September, 2002	61	Stephen Lane
---	-----------------	----	--------------

This *Research Report* describes offshore software outsourcing best practices in the context of case studies of enterprises that have, according to their own as well as commonly accepted criteria, achieved business and IT goals and objectives through offshore outsourcing. It includes key findings related to offshore outsourcing and 10 keys to offshore outsourcing success.

Best Practices in Private Exchange Implementations in Europe	August, 2002	61	Fran Howarth
--	--------------	----	--------------

This *Research Report* recognises those enterprises that have shown industry best practices in deploying private exchange technology to improve relationships with trading partners, control costs, streamline processes and enhance responsiveness across the extended supply chain. It includes a series of profiles of companies that have set up a private exchange to improve the efficiency of their operations, add value to their businesses, and increase their competitiveness and cut costs.

Mobile Middleware: Adding Business Value to Handheld Devices	July, 2002	21	Isaac Ro and Hugh Bishop
--	------------	----	--------------------------

This Aberdeen Report looks at ways vendors and enterprises can clear up the confusion and add an ROI connection between mobile middleware and the enterprise.

Professional Services Automation: Technology-Enabled Integration of People, Process and Capital Assets	July, 2002	202	David Hofferberth
--	------------	-----	-------------------

Professional Services Automation: Technology-Enabled Integration of People, Process and Capital Assets, an Aberdeen research report, outlines, identifies, and categorizes key findings in the market. It also describes PSA business drivers and analyzes market trends and technology solutions that can maximize organizational efficiencies.

Worldwide CRM Spending: Forecast and Analysis 2001-2005	July, 2002	57	Denis Pombriant and Hugh Bishop
---	------------	----	---------------------------------

Aberdeen's Research Report, *Worldwide CRM Spending: Forecast and Analysis 2001-2005*, is designed to give the reader comprehensive information about how the world will spend on CRM-related services and technology for the next four years. The Report also breaks down the overall growth to examine what will occur in horizontal and vertical markets, and the factors driving that growth.

Marketing Campaign Management: Benchmarking the User Experience	June, 2002	45	Harry Watkins
---	------------	----	---------------

In this research report, Aberdeen presents results from its first annual campaign management user satisfaction survey. Aberdeen analyzes the experience of customers of six leading suppliers and characterizes how campaign management software is selected, deployed, and used.

Customer Relationship Management: Mid-Market Holds Surprises	June, 2002	24	Hugh Bishop and Denis Pombriant
This Aberdeen Technology Forecasting Consortium Report, <i>Customer Relationship Management: Mid-Market Holds Surprises</i> , provides insight to suppliers looking to capitalize on the untapped market for CRM applications for midsize enterprises and also helps users in benchmarking their own CRM solutions.			
Web Analytics: Making Business Sense of Online Behavior	June, 2002	165	Guy Creese
Aberdeen's research report, <i>Web Analytics: Making Business Sense of Online Behavior</i> , helps business and Information Technology (IT) managers evaluate specific Web solutions by understanding the dynamics of the Web Analytics marketplace - appreciate the role that Web Analytics plays within the larger context of e-Business - and recognize the organizational demands of different types of Web Analytics offerings.			
What Works: Significant Voice Over IP Deployments of 2001	May, 2002	82	Dana Tardelli and George Peabody
<i>What Works: Significant Voice Over IP Deployments of 2001</i> , an Aberdeen research report, details Aberdeen's "call for papers" selection process, key research findings, and profiles the finalists.			
Benchmarking Financial Operations Processes and Technologies: The i-Way to Improved Financial Value Chain Processes	May, 2002	62	Andrei Arkhipov
<i>Benchmarking Financial Operations Processes and Technologies: The i-Way to Improved Financial Value Chain Processes</i> , an Aberdeen research report, examines why enterprises are keenly interested in the value-add that FVCM solutions - such as financing, risk management, invoicing, and payment - can bring to businesses.			
Enterprise Information Integration: The New Way to Leverage e-Information	May, 2002	78	Wayne Kernochan
<i>Enterprise Information Integration: The way to Leverage e-Information</i> , an Aberdeen research report, examines EII a new technology that allows users to leverage information from a wide variety of storage types, environments, applications, databases, and files.			
What Works: Ten Significant Streaming Implementations of 2001	April, 2002	74	Michael Hoch and Dana Tardelli
<i>What Works: Ten Significant Streaming Implementations of 2001</i> , an Aberdeen research report, includes background on Aberdeen's selection process, the key findings discovered, report preparation, and Aberdeen profiles of the ten finalists.			
Financial Analytic Software: User Observations	April, 2002	20	Alan Yong
<i>Financial Analytic Software: User Observations</i> , an April 2002 Aberdeen research report, gauges end-user awareness and perception of financial analytic applications, as well as their intent to purchase -- both by application category and by technology supplier.			
Worldwide IT Spending 2002-2005: Timing the Recovery	April, 2002	63	Hugh Bishop and Esme Fantozzi
<i>Worldwide IT Spending 2002-2005: Timing the Recovery</i> analyzes Information Technology (IT) spending, which Aberdeen defines as money spent on hardware, software or services that are of a commercial grade.			
Enterprise Incentive Management: Variable Compensation 2002	March, 2002	103	Katherine Jones
Enterprise Incentive Management (EIM), variable compensation, can be one of the most effective levers for aligning corporate goals with employee and extended channel behavior.			
Logistics Resource Management: Navigating the Technology Landscape	March, 2002	51	Jack Maynard, Tim Minahan, and Esme Fantozzi
<i>Logistics Resource Management: The Technology Landscape</i> provides detailed quantitative analysis of functionality and characteristics of LRM technology platforms, derived from data gathered from more than 60 LRM technology suppliers through a detailed survey and follow-up briefings.			
Software Management Solutions from Linux Suppliers: A Competitive Analysis	March, 2002 (Published)	55	Bill Claybrook
This Aberdeen research report covers relevant products, targeted markets, and business strategies for several emerging Linux-based companies, including Aduva, bayMountain, Caldera, Red Hat, Turbolinux, and Ximian.			
Worldwide Storage Management Spending: Forecast and Analysis 2001-2005	March, 2002	40	David Hill, Hugh Bishop, and Wyeth Lynch
<i>Worldwide Storage Management Spending: Forecast and Analysis 2001-2005</i> , analyzes what the world will spend on storage management software and			

services for the next five years.

What Works: Ten Significant CRM Implementations of 2001	March, 2002	141	Kent Allen, Chris Fletcher, Denis Pombriant, Karen Smith, and Harry Watkins
<i>What Works: Ten Significant CRM Implementations of 2001</i> , an Aberdeen research report, documents the ten most significant Customer Relationship Management (CRM) implementations of the past year.			
Logistics Resource Management	March, 2002	164	Jack Maynard, Tim Minahan and Esme Fantozzi
This <i>Research Report</i> introduces the concept of Logistics Resource Management (LRM) as an enterprise tool that works in conjunction with Enterprise Resource Planning (ERP), Supply Chain Management (SCM), and Collaborative Product Commerce (CPC) applications to streamline manufacturing and sourcing processes.			
What Works in Europe: Success Stories in Customer Relationship Management	February, 2002	98	Ute Appenzeller
<i>What Works in Europe: Success Stories in Customer Relationship Management</i> documents the selection criteria, implementation strategies, and technology solutions that European enterprises have used for successful CRM implementation.			
Technology Forecasting Consortium: 2002 User Buying Intentions	February, 2002	63	Hugh Bishop, Wyeth Lynch and James Tsai
<i>2002 User Buying Intentions</i> identifies the sectors that will lead the Information Technology (IT) spending recovery, as well as those that will lag in the market. For this report, Aberdeen surveyed the user members of Aberdeen's Technology Forecasting Consortium (TFC), encompassing 35 application categories and 11 technology infrastructure segments, as well as hardware and professional services.			
What Works: Ten Significant ASP Implementations	January, 2002	76	Lew Hollerbach and Stephen Lane
Aberdeen research has reaffirmed that Application Service Providers (ASPs) can offer enterprises large and small a number of benefits. <i>What Works: Ten Significant ASP Implementations</i> , an Aberdeen research report, showcases examples of excellence in ASP implementations across a range of businesses and industries.			
Best Practices in e-Procurement in EMEA	December, 2001	92	Frances Howarth
Ten of the most significant e-Procurement implementations in Europe and the Middle East and Africa (EMEA) are highlighted in <i>Best Practices in e-Procurement in EMEA</i> . This research report documents the selection criteria, implementation strategies, technology solutions and process redesign initiatives these enterprises used for successful e-Procurement deployment.			
What Works: Best Practices that Drive Net Market Viability	December, 2001	86	Bill Brandel
The history of Net Markets is riddled with frustrated efforts. However, through the turmoil, several have thrived, proving the viability of Net Markets and the key role they will continue to play in using the Internet as a mechanism to support critical business functions. These are highlighted in, <i>What Works: Best Practices that Drive Net Market Viability</i> .			
Service On Site: The Opportunities in Field Service Management	December, 2001	111	Chris Martins
An important, but often over looked, segment of the CRM market is Field Service Management (FSM). To analyze the current and future opportunities of FSM for suppliers and user organizations, Aberdeen has authored a research report, <i>Service On Site: The Opportunities in Field Service Management</i> .			
Best Practices in e-Procurement	December, 2001	117	Tim Minahan and Christa Degnan
<i>Best Practices in e-Procurement</i> documents the selection criteria, implementation strategies, technology solutions, and process redesign initiatives used for successful e-Procurement deployment.			
Professional Services Automation: End-User Survey	December, 2001	108	David Hofferberth
<i>Professional Services Automation: End-User Survey</i> includes a careful look at individual PSA implementations as well as an in-depth look at nine vendors in the PSA space.			
Worldwide CRM Spending: Forecast and Analysis 2001-2005	November, 2001	69	Christopher Fletcher and Isaac Ro
The global Customer Relationship Management (CRM) market will grow at a compound annual growth rate (CAGR) of 19.9% from \$13.45 billion in 2001 to \$27.76 billion in 2005. This research report examines what geographic and technologic areas will drive this growth.			
Offshore Software Development: Localization, Globalization, and Best	November, 2001	41	Stephen Lane

Practices in an Evolving Industry			
<i>Offshore Software Development: Localization, Globalization, and Best Practices in an Evolving Industry</i> examines the impact of globalization and localization in the offshore software development and outsourcing sectors as well as continuing changes in this highly diverse industry.			
What's Next in CRM: The Learning Relationship	November, 2001	205	Denis Pombriant
<i>What's Next in CRM: The Learning Relationship</i> , an Aberdeen research report, documents the changes in CRM today as well as outlines how business solutions are taking advantage of these advances.			
Optical Circuits: Market Realities & Potential - The Evolution of the Planar Lightwave Circuit (PLC) Market	October, 2001	132	Esme Fantozzi
The concept of "optical circuits" has generated a significant amount of hype in the components industry. To paint a realistic picture of where the optical components industry is in terms of integrated optics and planar waveguide technologies, Aberdeen produced <i>Optical Circuits: Market Realities & Potential - The Evolution of the Planar Lightwave Circuit Market</i> .			
Mobile Handheld Devices: Enabling Enterprise Communications and Data Management	October, 2001	132	Chrisopher Fletcher, Isaac Ro and David Wright
<i>Mobile Handheld Devices: Enabling Enterprise Communications and Data Management</i> , an Aberdeen research report, tracks the shifts of PDA market towards the enterprise as it is expected to grow at 30% CAGR through 2005 to \$6.6 billion.			
Business Applications for P-to-P: Innovating at the Internet Periphery	September, 2001	156	Alex Veytsel and Tom Dwyer
<i>Business Applications for P-to-P: Innovating at the Internet Periphery</i> , an Aberdeen research report, establishes clear value propositions for businesses seeking to tap into the promise of P-to-P technologies. This report helps P-to-P suppliers define their target market strategies as well as educate providers of established solutions about P-to-P challenges and opportunities.			
'Show me the Money': How e-Business Will Transform B-to-B Financial Processes	September, 2001	132	Andrei Arkhipov

This year's report, <i>Customer Relationship Management: Year 2000 Edition</i> , profiles more than 50 established and emerging CRM suppliers, examining their value propositions, key products, and market positioning. Download the CRM 2000 Datasheet here (PDF Format)			
Internet Bill Presentment and Payment: e-Business Solutions for Improved Customer Service and Cash Flow	August, 2000	126	Andrei Arkhipov
While the Internet is commonly used for information exchange and e-Commerce, most consumers and enterprises still use inefficient, manual processes for invoices and bill payment. Today, a growing number of individuals and companies using the Internet for corporate billing and online payment. Aberdeen's <i>Internet Bill Presentment and Payment</i> report examines the dynamics, suppliers, and technologies that make up this emerging market.			
Moving at Light Speed: The Transition to Optical Networks	August, 2000	156	Andrew McCormick
<i>Moving at Light Speed: The Transition to Optical Networks</i> provides vital information and analysis on the next generation of optically enabled networks (OENs). With the optical equipment market - excluding SONET elements - expected to reach \$17.7 billion by 2003, this report is a must-read for those interested in the optically enabled network (OEN) and how it is likely to evolve over the next five years. The report -- updated in August 2000 with 42 new profiles of key optical system suppliers -- analyzes each supplier's value propositions, the market segment(s) they target, and the technical features that differentiate their products.			
Mobile Electronic Commerce: New Economy on the Move	August, 2000	155	Kelly Quinn
Next-generation e-Business will be conducted over the wireless Internet on handheld devices and phones. In fact, Aberdeen's research indicates that by 2004, 74 million wireless users will be connected to the Web via handheld devices (such as Palm) and smart phones (cell phones with Internet access). In a new report entitled <i>Mobile Electronic Commerce: New Economy on the Move</i> , Aberdeen Group examines this complex, emerging industry.			
Evolution of a Revolution: The State of the ASP Industry	April, 2000	89	Lew Hollerbach
Application Service Providers (ASPs) offer IT users highly compelling reasons to move away from a systems/software ownership model. Newly positioned on the front lines of the New Economy, ASP solutions will have a positive ROI for organizations that use them, promising reduced computing costs, faster implementation of new initiatives, and access to new application functionality.			
Proving-the-Point: Interviews with Next-Generation Windows 2000 dot.coms	March, 2000	60	Joe Clabby
Microsoft's Windows 2000 operating environment has just been released. What are early adopters saying about reliability, scalability, and manageability? In this free Aberdeen report, Aberdeen describes its research findings based upon interviews with enterprise and dot.com IS managers, systems and software suppliers, and systems integrators.			
Enterprise Application Integration: Evolving to Meet e-Business Demands	February, 2000	203	Tom Dwyer
e-Commerce is having a huge impact on Enterprise Application Integration (EAI): not only are these two areas the two most important initiatives facing CIOs in the Global 2000 for this year, but this trend is the greatest challenge currently facing traditional EAI suppliers. Aberdeen's report, <i>Enterprise</i>			

Application Integration: Evolving to Meet e-Business Demands, provides vital information and insight into the real opportunities and forces influencing EAI in today's marketplace. It presents a clear and focused analysis on the convergence between e-Business Integration (eBI) and EAI, and how this trend is impacting best practices and processes geared for the Extended Enterprise.

Linux Multi-Client Study	January, 2000	211	Bill Claybrook
Aberdeen undertook this Multi-Client Study of global 2000 firms to determine the level of interest and acceptance of Linux. Almost 400 firms were interviewed with this number split at about 45% U.S. and 55% International. Each global 2000 firm has at least 5,000 employees and has sales and/or assets of over \$100M.			
Is Microsoft's Windows NT/Windows 2000 Enterprise-Ready?	January, 2000	96	Joe Clabby
Over the past few years, Aberdeen has chronicled and analyzed a variety of issues related to NT-based platform reliability, manageability, scalability, and security. Due to these issues and limitations, Aberdeen has held the position that Windows NT was not appropriate for running enterprise-grade, mission-critical applications in a reliable fashion. In fact, Aberdeen believed that Windows NT/2000 was better positioned as a workgroup operating environment.			
e-Learning in the Enterprise	November, 1999	149	Jim Ayube
Aberdeen's new report, <i>e-Learning in the Enterprise</i> , contains critical information about the rapidly evolving Web-based training and education solutions that are available to the enterprise.			
The Dash to Digital Cash: Enabling Internet Commerce Microtransactions Market Review and Competitive Analysis	October, 1999	154	Judith Rosall
Whether you are an Internet content provider, online merchant, or Internet service provider in search of a cost-effective payment model to sell low-priced digital goods or services - or you need to understand the latest market data and trends about Internet digital cash schemes - this newly published report will give you a complete understanding of the market.			
A Guide to Customer Relationship Management Professional Services: 1999 Edition	July, 1999	187	Stephen Lane
An integrated CRM solution is the foundation for Internet commerce, customer acquisition, and customer retention but there's turmoil among CRM market leaders. Careful evaluation of their services is more crucial now than ever before.
