InSight: Workspace's Acquisition of Performaworks Reflects Software Consolidation Trend in HCM Market

March 2004	Enterprise Business Applications	Dr. Katherine Jones
------------	----------------------------------	---------------------

Human capital management supplier Workspace, Inc., of Framingham, MA, is acquiring Burlington, MA-based Performaworks, Inc., a prominent provider of performance management solutions.

InSight: eBay: A New Home for the Holidays?

January 2004	Multichannel Retail	Jamie Bedard and Kent Allen
--------------	---------------------	-----------------------------

This *InSight* examines eBay's successes to date and describes how several different sellers are utilizing eBay as a complementary e-channel.

InSight: Midmarket Footprint Changes: Best Acquires ACCPAC

January 2004	Enterprise Applications	Dr. Katherine Jones
--------------	-------------------------	---------------------

The Sage Group, plc, known as Best Software in North America, announced its intent to acquire ACCPAC International, Inc., a subsidiary of Computer Associates International, Inc.

InSight: WAN Optimization Techniques Improve Application Delivery

January 2004	Application Performance and Content Networking	Michael Hoch
--------------	--	--------------

An IT manager's traditional response to a network-oriented application delivery challenge is to increase the bandwidth capacity of the wide area network, or WAN. It should not be.

InSight: Demand More When Upgrading Layer 4-7 Gear

December 2003	Application Performance and Content Networking	Michael Hoch
---------------	--	--------------

IT managers consumed with today's network problems know that there will be more issues tomorrow.

InSight: Microsoft Momentum Ties "Classic" with MBS

October 2003	Customer Relationship Management and Enterprise Applications	Karen Smith and Katherine Jones
--------------	--	---------------------------------

The *InSight* reports on Microsoft's concerns about its new vision for its next-generation partner program framework, which many partners received with trepidation when it was announced recently.

InSight: Emagineering - Initiative Management and Resolution Help Business and IT Bridge "Communications Gap"

September 2003	Professional Services Automation	R. David Hofferberth
----------------	----------------------------------	----------------------

Project portfolio management (PPM) solutions undeniably give CIOs and other executives visibility into the projects, resources, costs, and the resulting value offered by project-based initiatives.

InSight: ACCPAC Raises the Stakes for Midmarket ERP

September 2003	Enterprise Applications	Katherine Jones
----------------	-------------------------	-----------------

ACCPAC is unsurpassed in the breadth of infrastructures supported - providing its customers with the maximum choice and flexibility in operating environments.

InSight: Focusing on the "Global" in IBM Global Services

August 2003	IT Services	Stephen Lane
-------------	-------------	--------------

In this *InSight*, Aberdeen examines IBM's "offshore" capabilities in the context of the globalization of the IT services industry.

InSight: Recovery in IT Spending Gathers Strength

August 2003	Emerging Technology Intelligence	Hugh Bishop and James Tsai
-------------	----------------------------------	----------------------------

Aberdeen's analysis of the Q2 2003 financial results for the top 20 IT suppliers shows an increase in year-over-year revenues of 6.1%, the best showing since the first quarter of 2001, when the IT recession began.

InSight: Microsoft Business Solutions Expands Business Portal with HCM, KPI Extensions

August 2003	Enterprise Applications	Dr. Katherine Jones
-------------	-------------------------	---------------------

Microsoft Business Solutions follows the announcement of its Business Portal with programs to populate it in three areas: employee and manager self-service,

KPIs for business intelligence, and FRx report ability. The economical packages, sold as separate modules, add useful functionality to the framework provided by the Business Portal.

InSight: [HP's New Mantra for Consumer Electronics: "Enjoy More"](#)

August 2003	Digital Consumer Technology	Peter Kastner
-------------	-----------------------------	---------------

In this *InSight*, Peter Kastner examines some of HP's leading-edge products and analyzes the company's consumer-focused strategy.

InSight: [Ceridian Drives Managed HR Solutions and Services; Announces Partnership with SoftScape](#)

August 2003	Enterprise Applications	Katherine Jones
-------------	-------------------------	-----------------

In the growing world of human capital management (HCM) outsourcing, Ceridian launched total employee services, which allow companies, especially those in the middle market, to outsource their entire HCM operations.

InSight: [Epicor Buys ROI Systems; Expands ERP Reach](#)

July 2003	Enterprise Applications	Katherine Jones
-----------	-------------------------	-----------------

Targeting the vertical industries is the mantra du jour of the companies that make enterprise resource planning (ERP) systems, whether they are for the middle middle-market manufacturing environments or very large corporations.

InSight: [Services Supply Chain: Strategies for a Buckshot Market](#)

July 2003	Supply Chain Research	Christa Degnan
-----------	-----------------------	----------------

The global recession has forced businesses to curb costs. Consequently, companies are scrutinizing every variable expense area to remain viable. A recent Aberdeen-Penton Media survey yielded five key tactics that enterprises can use to establish a services supply chain optimization strategy today.

InSight: [Siebel User Week 2003, Cannes, France](#)

June 2003	Customer Relationship Management	Denis Pombriant
-----------	----------------------------------	-----------------

Siebel Systems met with its European, Mid-Eastern, and African (EMEA) customers in Cannes, France, to report on its progress on a number of fronts and to ask them for input in its overall directions. The company also announced several new product versions to be delivered over the balance of 2003.

InSight: [Sapphire and the Uncertain Marketplace](#)

June 2003	Customer Relationship Management	Denis Pombriant
-----------	----------------------------------	-----------------

SAP rolled out version 4.0 of its CRM product at the 2003 Sapphire user group meeting in Orlando. Among the highlights for CRM, the company says it has 2,000 customers and it is now offering special-ized applications in 15 vertical markets.

InSight: [The Demand-Driven Retail Value Chain](#)

June 2003	Customer Relationship Management	Kent Allen
-----------	----------------------------------	------------

Throughout the 2003 Retail Systems 2003 show, retailers were asked to embrace business process-centric, IT-driven innovation. E-commerce, product data synchronization, product information management, pricing and merchandise optimization, and order execution all represent key solutions that will help enable retailers move from product-centric operational strategies to customer-driven business models.

InSight: [Melding Financial Operations and Analytics: The New Financial Battleground](#)

June 2003	Data Knowledge and Analytics	Alex Veytsel
-----------	------------------------------	--------------

Although top enterprises are already joining financial analytics (e.g., budgeting, planning, and forecasting) with FVCM software (e.g., invoicing, trade credit, and settlement) in corporate performance management initiatives, the Sarbanes-Oxley Act will accelerate the need for most public companies to join the two technologies.

InSight: [Sarbanes-Oxley: Tightening the Link between Financial Analytics and the Financial Value Chain](#)

June 2003	Data Knowledge and Analytics	Alex Veytsel
-----------	------------------------------	--------------

Operational systems serving the financial value chain have traditionally worked separately from financial analytic software because their architectures and business functions have been different. But new federal rules governing corporate reporting and disclosure are demanding an analysis of many more details about a company's key transactions — precisely those found in FVCM systems. The time is ripe for a closer link between the transactional and the analytical.

InSight: [J.D. Edwards: Customer-Centric Amidst Chaos](#)

June 2003	Enterprise Business Applications	Katherine Jones
-----------	----------------------------------	-----------------

Despite a week of acquisition mania, J.D. Edwards, an acquisition target of PeopleSoft (itself a target of Oracle), held a user conference in Denver, where about 7,000 attendees, including JDE customers, prospects, and partners met to see new product features, performance upgrades, and application enhancements.

InSight: [Baan Finds a New Home with Investors Cerberus and General Atlantic](#)

June 2003	Enterprise Applications	Katherine Jones
-----------	-------------------------	-----------------

Free from struggling Invensys plc, Baan joins SSA GT under a group consisting of two of the world's foremost private investment firms. Baan brings industry-

leading experience and manufacturing application expertise to its new parent company, and the infusion of cash into the company will support the launch of Baan's next-generation industry application architecture for discrete manufacturing enterprises.

[InSight: i2's Recovery: Another Bad Forecast or a Real Executable Plan?](#)

June 2003	Demand Chain Management	Kent Allen
At i2 Planet 2003, 1,300 attendees, representing more than 300 companies, exchanged updates on the state of their supply networks and sought whatever information they could find about i2's financial and operational health.		

[InSight: Supplier Revenues Warn of an Industry Realignment](#)

May 2003	IT Forecasting	Hugh Bishop and James Tsai
Total revenue at the twenty largest technology suppliers increased 3.7% in Q1 2003 over the same period last year. Coupled with an 28% increase in net income for the same group, the IT industry showed surprisingly good performance.		

[InSight: IT Services Suppliers from Opposite Ends of the Industry Value Chain are Racing to the Middle](#)

May 2003	IT Services	Stephen Lane
Wipro Technology's recent announce-ment that it is making its second U.S. acquisition in five months shows just how serious the big Indian IT services suppliers are about moving up the industry value chain.		

[InSight: PC Replacements: Lawyers, Auditors, and Common Sense Rules](#)

May 2003	Digital Consumer Technology	Peter Kastner
Prudent businesses should consider accelerating their PC replacements. The good news is, this is an excellent time to start planning a PC acquisition cycle.		

[InSight: Lawson Affirms Focus on Verticals at CUE](#)

May 2003	Enterprise Business Applications	Dr Katherine Jones, Kent Allen, and David Hofferberth
This Aberdeen <i>InSight</i> reviews some of the products and progress announced at CUE. Topics covered here include Lawson's alliance with Deloitte & Touche to highlight information technology (IT) value, new vertical offerings for health care and retailing, and Lawson's international growth and new outsourcing partnership.		

[InSight: SARS to Reduce IT Spending by \\$2.2 Billion](#)

April 2003	Technology Forecasting	Hugh B. Bishop
In this <i>InSight</i> , Aberdeen has used its proprietary World IT Spending Calculator to provide an initial, quantitative assessment of SARS on industry revenues.		

[InSight: Improving the User's Experience with Wireless Device Management](#)

April 2003	Mobile and Wireless Technologies	Isaac Ro
This <i>InSight</i> considers the growing importance of wireless device management and its potential for network operators and IT decision makers. Part six of six in Aberdeen's Emerging Client Technologies Insight Series		

[InSight: Cash Inflow Management: Beyond Receivables Systems, Electronic Invoicing, and Order-to-Cash](#)

April 2003	Financial Analytics	Alan Yong
Managing the inflow of cash in a corporation is a multifaceted operation, involving many departments, processes and employees. Examples include credit management, pricing, invoicing, accounts receivable, deduction, and collections.		

[InSight: When Caching and CDNs Fall Short, Managed Delivery Takes Over](#)

April 2003	Semiconductors	Michael Hoch
Caching and content delivery networks can decrease delivery costs, but it takes a managed delivery solution to give network and business managers complete control over the delivery of their data, content, and applications.		

[InSight: Trends in Design and Manufacturing Approaches for Handsets](#)

April 2003	Semiconductors	Russ Craig
In this <i>InSight</i> Aberdeen analyzes trends in design and manufacturing technologies targeted at improving price performance, reducing time-to-market, increasing the lifecycle of handset platform technology, and reducing thresholds to experiment with widely varying 2.5 and 3G services. Part five of six in Aberdeen's Emerging Client Technologies Insight Series		

[InSight: IBM's Legacy Application "Antiques Road Show"](#)

April 2003	IT Services	Stephen Lane
IBM's April 10, 2003 announcement of a new suite of legacy application services and software brings to mind the popular public television series, The Antiques Road Show.		

[InSight: Integrated Chipsets Will Get Even Smaller, Faster](#)

April 2003	Wireless	Isaac Ro
This <i>InSight</i> examines the rush to put low-cost, innovative devices into the hands of eager subscribers. Part four of six in Aberdeen's Emerging Client Technologies Insight Series		
<i>InSight: Microsoft Sharpens Focus on Mid-market Enterprise Application Stack</i>		
April 2003	Enterprise Applications	Katherine Jones
Microsoft's messages at its Convergence 2003 conference centered on the big picture - enhancing productivity through integrated applications and agile, collaborative connectivity.		
<i>InSight: Trends in Power Consumption and Novel Charging Technologies for Handsets</i>		
April 2003	Semiconductors	Russ Craig
As both long standby and talk times are key to consumer satisfaction, technology suppliers are aggressively pursuing improved power efficiencies and novel approaches to power provisioning. This <i>InSight</i> explores recent and upcoming advances in both categories. Part three of six in Aberdeen's Emerging Client Technologies Insight Series		
<i>InSight: A Mobile Industry Update: CTIA Spring 2003</i>		
March 2003	Mobile Technology	Dana Tardelli and Isaac Ro
In this <i>InSight</i> , Aberdeen discusses announcements made by network operators, platform suppliers, clients, and miscellaneous suppliers and what impact they will have on the wireless market.		
<i>InSight: Fulfilling the Retail Value Chain</i>		
March 2003	Multichannel Retail	Kent Allen
This Aberdeen <i>InSight</i> highlights how retail enterprises are dedicating more attention to the tactical elements of supply chain execution processes by investing in order management and order fulfillment solutions.		
<i>InSight: The Display of the Future: Organic LEDs and Thin-Film Polymers</i>		
March 2003	Mobile Technology	Isaac Ro and Russ Craig
First-generation consumer products employing OLEDs are just now hitting the market, with long-term implications. Part two of six in Aberdeen's Emerging Client Technologies Insight Series		
<i>InSight: CPM: Corporate Agility Strikes Back</i>		
March 2003	Data Knowledge	Bob Moran and Alex Veytsel
This <i>InSight</i> discusses corporate performance management (CPM), a combination of technology and process that enables enterprises to challenge decentralized competitors at their point of weakness: an inability to share sensitive information and coordinate their actions for the common good.		
<i>InSight: IT Spending Shows Mixed Results</i>		
March 2003	IT Spending	Hugh Bishop and James Tsai
The Q4 2002 revenue figures for Aberdeen's benchmark groups show mixed results. Some of the results are disheartening, but several rays of light also shone through in Q4 of 2002.		
<i>InSight: What's Next for Mobile Handsets?</i>		
March 2003	Wireless	Dana Tardelli, Isaac Ro, and Russ Craig
This <i>InSight</i> , the first segment in Aberdeen's six-part Emerging Client Technologies Insight Series , analyzes the current handset market dynamics that will drive demand for new client technologies.		
<i>InSight: e-Business On Demand: Transcending Distinct Business Processes</i>		
March 2003	e-Business, CRM	Kent Allen and Stephen Lane
In this <i>InSight</i> , Aberdeen examines IBM's position on e-Business on Demand and its ramifications for the CRM software industry.		
<i>InSight: Design-Driven Development: Good Only If Done Well</i>		
March 2003	Databases, Development Environments, and Software Infrastructure	Wayne Kernochan
Over the last four years, development tool suppliers have devoted a great amount of attention to two key design standards: UML (Unified Modeling Language) and MDA (Model-Driven Architecture). These standards are the spearheads of a supplier effort to increase the importance of design tools and design in users' development processes.		
<i>InSight: IT Buyers Face Up to 2003 Storage Challenges</i>		
February 2003	Storage and Storage Management	David Hill and Wyeth Lynch

This *InSight* discusses findings from an Aberdeen Web survey of IT departments regarding storage trends that are expected to emerge in 2003.

InSight: [Software Quality: Test, Automate, Satisfice](#)

February 2003	Development Solutions	Wayne Kernochan
---------------	-----------------------	-----------------

This *InSight*, the fifth in a six-part series, discusses three approaches that appear to promise additional improvements in software quality.

InSight: [Online Advertising: Getting Back to Business](#)

February 2003	e-Business/e-CRM	Kent Allen
---------------	------------------	------------

By examining Aberdeen's recent coverage of the e-marketing community, this *InSight* explores the re-emergence of ad serving companies - innovative ways that companies are using the online channel to meet branding objectives - and the state of e-merchandising technologies.

InSight: [Optimizing Excess Inventory and Overstocks: Revisiting an Outdated Retail Process](#)

February 2003	e-Business/e-CRM	Kent Allen
---------------	------------------	------------

Why are inventory management and pricing optimization two important topics for retail organizations in 2003?

InSight: [Programmer Productivity Reconsidered: Reusability Considered Harmful — Refactoring Not](#)

February 2003	Development Environments, and Software Infrastructure	Wayne Kernochan
---------------	---	-----------------

Improving programmer productivity has for many years been the Holy Grail of development technologies, and over the last five years, reusability has been the method of choice.

InSight: [Online Retail: Propelling the Multichannel Vision into Reality](#)

February 2003	e-Business/e-CRM	Kent Allen
---------------	------------------	------------

This *InSight* provides a glimpse into the lessons learned by three multichannel retailers whose commitment to integrating their online channels with their catalog and retail operations is starting to pay off.

InSight: [Personalization: Now It's Concierge Treatment](#)

February 2003	Data Knowledge and Analytics	Guy Creese
---------------	------------------------------	------------

The formerly over-hyped personalization market has given personalization a bad reputation.

InSight: [Existing Application Upgrade Is Key to Future E-Business Strategies](#)

January 2003	Development Environments, and Software Infrastructure	Wayne Kernochan
--------------	---	-----------------

This *InSight*, third in a five-part series, discusses how only legacy application Web enablement and Web servicing by "upgrade in place" will cost-effectively allow access to this key information.

InSight: [The Tortoise and The Hare Redux](#)

January 2003	Storage and Storage Management	Dan Tanner
--------------	--------------------------------	------------

Enterprise IT planners should maintain an open mind toward using IP for storage networking.

InSight: [Networking Storage? Think Security!](#)

January 2003	Storage and Security	David Hill, Jim Hurley, Dan Tanner
--------------	----------------------	------------------------------------

Making networked storage safer, more productive, and less risky.

InSight: [Agile Programming, Extreme Programming, and Refactoring: Not Just Another Development Fad](#)

January 2003	Databases, Development Environments, and Software Infrastructure	Wayne Kernochan
--------------	--	-----------------

In this *InSight*, Aberdeen discusses how agile programming and its Extreme Programming and refactoring "submovements" promote development "reengineering" rather than promise greater control.

InSight: [A Return to Rationalism: Telecom 2003](#)

January 2003	Communication Services	Dana J. Tardelli
--------------	------------------------	------------------

Aberdeen is optimistic about the U.S. telecom market in 2003, but it's time for a serious clean-up effort.

InSight: [Developing the Enterprise's Software Portfolio: A Long-Term Strategy to Avoid "Software Sclerosis"](#)

January 2003	Software Infrastructure	Wayne Kernochan
--------------	-------------------------	-----------------

This *InSight*, the first in a five-part series, discusses the steps IT organizations need to take in order to prevent "software sclerosis" from suffusing their

organizations."		
<i>InSight:</i> Advice to Enterprise IT Planners: Eyes on the Prize		
January 2003	Storage	Dan Tanner
Enterprise IT planners should maintain focus on long-term objectives, and not overcommit to proprietary, potentially dead-end "solutions" no matter how high their "cool" factor.		
<i>InSight:</i> Data Quality at a Real-Time Tempo		
January 2003	Data Knowledge & Internet Analytics	Guy Creese and Alex Veytsel
Batch-driven data quality tools can often be ineffective or even harmful in the real-time enterprise. Consequently, if real-time oriented enterprises are to handle the depth and dynamism of real-time analytics, they need to look for data quality architectures that are broker based, triage oriented, and time sensitive.		
<i>InSight :</i> Time to Get Serious About the Online Channel		
December 2002	E-business, E-CRM	Kent Allen
This <i>InSight</i> discusses recent studies that reveal that many U.S. corporations are placing their brand equity in jeopardy by disregarding problems related to the online channel, which is emerging as the channel of choice for consumers.		
<i>InSight :</i> I Tell Ya, Storage Don't Get No Respect...		
December 2002	Storage and Storage Management	Dan Tanner
Enterprises will derive maximum value from their storage when any qualified user can receive secure access to information at the highest possible speed, without regard to distance, time of day, or the type of user device or storage platform.		
<i>InSight :</i> Worldwide PLM Spending Forecast and Analysis 2001-2005		
December 2002	Product Lifecycle Management	Jack Maynard
Corporate spending on project lifecycle management technology, which helps manufacturers address metrics of product innovation and quality, will grow during the flat economy.		
<i>InSight :</i> Nextel Finally Gets Some Respect		
November 2002	Communications Services	Dana Tardelli
This <i>InSight</i> discusses how Nextel is thinking on a different plane than its competitors and explains how Nextel's Boost subsidiary is expected to help the company be a key player in the mobile youth market.		
<i>InSight :</i> WiFi-x Is Booming - But the Shakeout Has Started!		
November 2002	Semiconductors	Russ Craig
This <i>InSight</i> discusses the shakeout that has started in the wireless LAN market and cites three trends - captive sockets, integration of the baseband/media-access controller into adjunct processors, and innovation in the RF front-end - that are expected to intensify the competitive pressures on smaller incumbents and fuel the shakeout fire.		
<i>InSight :</i> Will the Real HP Please Stand Up?		
November 2002	Digital Consumer Technology	Peter Kastner
A week after president Michael Cappellas exited Hewlett-Packard to head up Worldcom, HP announced top- and bottom-line growth that surprised Wall Street. The stock jumped 20%. Aberdeen was not caught off guard.		
<i>InSight :</i> IT Spending Shows Encouraging Signs		
November 2002	Emerging Technology Intelligence	Hugh Bishop
Cautious optimism is the current sentiment with respect to capital outlays for IT products and services, according to Aberdeen's initial analysis of the Q3 2002 financial results for the top 20 IT suppliers.		
<i>InSight :</i> Collaborative Planning: You Can't Optimize What You Can't See		
November 2002	Supply Chain Management	William Brandel
This <i>InSight</i> discusses collaborative planning, which represents the opportunity for companies to align, coordinate, and synchronize the flow of pertinent data, between internal entities and external trading partners, so that they can arrive at a unified plan that is the basis for executing go-to market activities.		
<i>InSight :</i> ACCPAC Expands Reach: A Transition from Accounting Applications to Mid-Market Enterprise Solutions		
November 2002	Enterprise Business Applications	Katherine Jones
This <i>InSight</i> explores the challenge of getting ACCPAC's target markets to take ACCPAC seriously as an enterprise solution provider.		
<i>InSight :</i> Less Money Equals New IT Motivations		
October 2002	Emerging Technology Intelligence	Wyeth Lynch

This Aberdeen *InSight* shows that overall economics, top-line revenues, and profitability must improve before purchasing resumes. Additionally, suppliers need to re-craft their marketing messages if they are to resonate with user organizations.

InSight: [Microsoft Business Solutions - The New Wave at Stampede](#)

October 2002	Enterprise Business Applications	Katherine Jones
--------------	----------------------------------	-----------------

This *InSight* examines Microsoft's solution framework; explains its "surround" strategy, which places business-specific applications on top of the business platform; describes Microsoft's applications for customer relationship management, professional services automation, and manufacturing; and discusses the challenges MBS will face as it strives to own the business "stack."

InSight: [Wireless LAN Security: An Adolescent Market](#)

October 2002	Information Security	Eric Hemmendinger
--------------	----------------------	-------------------

This Aberdeen *InSight* discusses the challenge IT decision makers face in trying to plan for the safe, effective use of wireless LAN technology in their organizations.

InSight: [Microsoft's Move to PSA: What Does this Mean for the Market](#)

October 2002	Professional Services Automation	David Hofferberth and Wayne Goodreau
--------------	----------------------------------	--------------------------------------

Business Solutions Professional Services Automation stands ready to stampede the PSA market.

InSight: [802.11a,b Wireless Comes of Age](#)

October 2002	Semiconductors	Russ Craig
--------------	----------------	------------

Wireless technology has come of age, but many vendors will not remain in this market a year from now.

InSight: [Worldwide Business Process Management Spending: Forecast and Analysis \(2001-2005\)](#)

October 2002	Darcy Fowkes	Internet Infrastructure
--------------	--------------	-------------------------

This unique technology sector uses much older workflow-related solutions and applying them to much grander domains.

InSight: [Standards Are Crucial](#)

October 2002	Storage and Storage Management	Dan Tanner
--------------	--------------------------------	------------

Standards are the only true path to the "Holy Grail" of an information technology (IT) utility.

InSight: [People's Republic of China: the Next Competitive Nightmare in Electronics](#)

October 2002	Digital Consumer Technology	Russ Craig
--------------	-----------------------------	------------

This Aberdeen *InSight* includes examples of PRC-based firms that have launched successful forays into the Western consumer electronics market. It also discusses ways that Western consumer electronics vendors can exploit the competitive advantage now available in the PRC and form relationships that will result in win-win situations.

InSight: [Baring the Financials: More than Current Financial Systems Can Bear?](#)

October 2002	Financial Analytics	Alan Yong and Alex Veytsel
--------------	---------------------	----------------------------

Aberdeen explores the scope of the recent federal disclosure requirements and describes the technologies that can help companies comply with the legislation.

InSight: [People's Republic of China: the Next Competitive Advantage in Electronics](#)

September 2002	Semiconductors	Russ Craig
----------------	----------------	------------

The People's Republic of China has evolved into a high-quality electronics source, but you have to know the territory.

InSight: [Active eIRM Security: A Dynamic Electronic Maginot Line](#)

September 2002	Security	Jim Hurley
----------------	----------	------------

Although software viruses are not going away, active Internet content has replaced them as the threat that enterprises must combat

InSight: [Siebel 7.5 Puts Methodology in the Spotlight](#)

September 2002	Customer Relationship Management	Denis Pombriant
----------------	----------------------------------	-----------------

With this new version, Siebel exposes business processes as Web services to enable Siebel applications to share data and processes with third-party applications.

InSight: [Support Automation: A More Prominent Position Within CRM and PRM Deployments](#)

August 2002	Customer Relationship Management	Karen E. Smith
-------------	----------------------------------	----------------

Support Automation -- Companies must be willing to look at new ways to meet support requirements through innovative automated service and support solutions.

InSight: [Event Management: The Missing Link in Supply Chain Services](#)

August 2002	Supply Chain Management	William Brandel
-------------	-------------------------	-----------------

Unfortunately, most supply chains experience delays, disruptions, and failures on a regular basis. Even those companies with the most advanced supply chain management systems are vulnerable to variable performance, unplanned events, and uncertainty. Event management (EM) applications enable managers to respond to supply chain exceptions as they happen. This Aberdeen *InSight* defines EM in relation to supply chain event management and outlines its importance as enterprises consider how they can update their SCM strategies in a struggling economy.

InSight: [IT Purchasing: The View From the End of the Tunnel](#)

August 2002	Digital Consumer Technology	Peter Kastner
-------------	-----------------------------	---------------

Key changes in IT management perception must be recognized as the industry comes out of the tunnel of recession.

InSight: [IT Purchasing Shows Signs of Stabilizing](#)

August 2002	Technology Forecasting	Hugh Bishop and James Tsai
-------------	------------------------	----------------------------

This *InSight* details how performance varied significantly by technology sector, which Aberdeen believes will be a hallmark characteristic of the industry in the future.

InSight: [Dual-Band Wireless Home Networking: It's Beginning to Look Like Christmas](#)

August 2002	Semiconductors	Russ Craig
-------------	----------------	------------

This *InSight* puts the unfolding "WiFi" market in perspective, helping to unravel the meaning of the various 802-dot specifications and their promise.

InSight: [Give me Small, Fast Disks To Support High-Performance Applications](#)

August 2002	Storage	Dan Tanner and Wayne Kernochan
-------------	---------	--------------------------------

This Aberdeen *InSight* examines disk storage and storage area network (SAN) trends.

InSight: [Does Intel's Decision Not To Manufacture InfiniBand Silicon Damage the Initiative?](#)

August 2002	Digital Consumer Technology	Russ Craig and Peter Kastner
-------------	-----------------------------	------------------------------

This Aberdeen *InSight* explores the rationale behind Intel's decision and explains how the move is good for Intel, and - contrary to other opinions - how it is good for the InfiniBand ecosystem.

InSight: [Surveying the Playing Field: Who's Who in Mobile Middleware](#)

August 2002	Digital Consumer Technology	Isaac Ro
-------------	-----------------------------	----------

Wither mobile middleware? In this *InSight*, we segment the mobile middleware market and point out that in the right scenarios, deploying mobile middleware solutions makes sound business sense.

InSight: [Undercutting and Upselling: Dell's Foray into the Handheld Market](#)

August 2002	Digital Consumer Technology	Isaac Ro and Peter Kastner
-------------	-----------------------------	----------------------------

Dell, which is poised to enter the PDA market with possibly low-priced products, could light a fire under the enterprise PDA market.

InSight: [Microsoft: "Nothing but .Net?"](#)

August 2002	Customer Relationship Management	Christopher Fletcher and Dana Gardner
-------------	----------------------------------	---------------------------------------

Microsoft has made significant technological progress in bringing .Net technology to the marketplace, but continues to have trouble answering IT's fundamental question, "What is it?"

InSight: [IT Spending: Buying Intentions and Budget Planning Update](#)

July 2002	Technology Forecasting Consortium	Wyeth Lynch
-----------	-----------------------------------	-------------

In this *InSight*, Aberdeen asked members of its Technology Forecasting Consortium - which includes CIOs, CTOs, and IT executives - if they anticipate changing their 2002 IT budgets in Q3 and Q4, relative to their budgets in Q1 and Q2.

InSight: [Web Analytics ASPs: Making Market Waves](#)

July 2002	Internet Analytics	Guy Creese
-----------	--------------------	------------

Drawing on data collected during the creation of Aberdeen's recent report, Web Analytics: Making Business Sense of Online Behavior, this *InSight* investigates and answers those questions.

InSight: Automated Web Application Vulnerability Testing Keeps Web Applications From Being Hacked		
July 2002	Information Security	Eric Hemmendinger
This <i>InSight</i> looks at what is needed: a means of locating and removing the very vulnerabilities that hackers exploit. Instead of stopping hackers, automated web-application vulnerability testing removes vulnerabilities.		
InSight: Alternate Consumer Electronics Channels and Suppliers Emerge, Threatening Incumbents		
July 2002	Semiconductors	Russ Craig
This Aberdeen <i>InSight</i> examines some of the new hardware offerings from service and content providers and discusses several advantages S&C providers have over traditional CE channels.		
InSight: Expense Management Automation (EMA) in Action: Value Affirmed		
July 2002	Supply Chain Research	Christa M. Degnan
This <i>InSight</i> reports the quantitative results of this latest research and discusses how expense management automation plays a role in optimizing organizations' entire supply chains.		
InSight: Stand-alone Personal Video Recorders: Many Forms, Same Function		
July 2002	Semiconductors	Russ Craig
This <i>InSight</i> examines the state of the PVR market; explains the form-factors, prices, and suppliers of current PVR offerings; and examines possible inhibitors to consumer adoption of this emerging technology.		
InSight: Resetting Expectations for the U.S. Telecom Market		
July 2002	Communication Services	Dana J. Tardelli
This Aberdeen <i>InSight</i> discusses the inherent flaws in economic fundamentals that have challenged the industry while also outlining the microeconomic fundamentals that Aberdeen thinks will define the future of the industry.		
InSight: Event Stream Management: Re-Synching Analytics with Business		
July 2002	Data Knowledge and Analytics	Alex Veytsel
This <i>InSight</i> examines Event Stream Management (ESM), an emerging class of software for re-synchronizing analysis and business and turning real-time analytics into real-time action.		
InSight: E-mail Marketing: The Last Mile of CRM?		
June 2002	Customer Relationship Management	Kent Allen
A growing number of IT buyers — especially those in the mid-market — will divert resources initially dedicated to broader CRM suite deployments to e-mail-centric customer lifecycle messaging applications.		
InSight: Getting a Foot into Wireless: The MVNO Gamble for Microsoft		
June 2002	Communication Services	Isaac Ro, Dana Tardelli, and George Peabody
In this <i>InSight</i> , Aberdeen reveals an all-or-none payoff for Microsoft if it adopts an MVNO strategy to enter the wireless market. The <i>InSight</i> also details how consolidation among wireless carriers might affect such a strategy and explores which carrier would make the ideal partner with Microsoft as an MVNO.		
InSight: The Network Is the Mainframe		
June 2002	Storage and Storage Management	Dan Tanner
This Aberdeen <i>InSight</i> explains the "Network as the Mainframe" vision and its potential benefits to enterprises.		
InSight: Cable and Telco Companies Battle for Home Internet Gateway and Network		
June 2002	Personal Information Technology and Semiconductors	Russ Craig and Peter Kastner
In this <i>InSight</i> , Aberdeen examines what cable and telco providers are doing to differentiate themselves in a market that will become more competitive, how leading hardware vendors are enabling these new services to take shape, and what the implications are for young suppliers looking to succeed in this environment.		
InSight: Reaching CIOs: Webinars Deliver Technology Education		
June 2002	Application Service Providers	Wyeth Lynch and David Aponovich
This Aberdeen <i>InSight</i> presents the results of a recent Aberdeen survey of IT executives regarding their use of Webinars.		
InSight: Marketing Campaign Management: Learning from the User's Experience		
June 2002	Customer Relationship Management	Harry Watkins

This *InSight* provides an overview of Aberdeen's recently published report, Marketing Campaign Management: Benchmarking the User Experience, which details the results of a research project based on a campaign management user satisfaction survey.

InSight: [Microsoft and Security: A Sleeping Giant Awakens](#)

June 2002	Information Security	Jim Hurley
-----------	----------------------	------------

This *InSight* considers that if the past is any predictor of the future, Microsoft's entry in 2002 may be seen - a few years from now - as a seminal event in the evolution of the security industry.

InSight: [Pity the Poor Consumer Electronics Manufacturer](#)

June 2002	Semiconductors	Russ Craig
-----------	----------------	------------

This Aberdeen *InSight* summarizes the challenges facing Consumer Electronics manufacturers and what they need to do to fight back.

InSight: [Automating Security Patches: A Two-Billion-Dollar Business Opportunity](#)

June 2002	Information Security	Eric Hemmendinger
-----------	----------------------	-------------------

This *InSight* reports that suppliers that can deliver the right mix of capabilities to help customers solve the security patch morass will get a jump on a huge untapped business opportunity.

InSight: [XMI and UML Liberate Hijacked Process Models for Improved Collaboration and Reuse](#)

June 2002	Enterprise Systems Management	Tim Sloane
-----------	-------------------------------	------------

This Aberdeen *InSight* looks at standards that enable business process and software reuse.

InSight: [Security Policy Automation and IT Systems: Putting the Buyer Back in Charge](#)

May 2002	Security	Jim Hurley
----------	----------	------------

This Aberdeen *InSight* examines PoliVec, one of the new suppliers providing security policy automation tools that make it cost effective to define, detect, deploy, and document consistent security programs for the enterprise.

InSight: [Is a CRM Turnaround in Sight?](#)

May 2002	Customer Relationship Management	Hugh Bishop and Esme' Fantozzi
----------	----------------------------------	--------------------------------

This Aberdeen *InSight* identifies the emergence of new suppliers and product categories and the resumption of overall IT spending growth, which Aberdeen forecasts for later in 2002, as indicators of what could be a trend inversion for the CRM sector.

InSight: [Baan Ups the Ante for Manufacturing Enterprises Through Integrated SCM, CRM, and PLM](#)

May 2002	Enterprise Applications	Katherine Jones
----------	-------------------------	-----------------

This Aberdeen *InSight* outlines Baan's new products serving SCM, distribution and logistics, CRM, and its latest addition, PLM.

InSight: [A Kinder, Gentler Larry Ellison? Oracle Presents New Face to Its User Community](#)

May 2002	Enterprise Applications	Katherine Jones
----------	-------------------------	-----------------

This *InSight* offers an overview of the Oracle Apps World conference held recently in San Diego; the conference had a different feel this year, as new product announcements were largely absent - replaced by an emphasis on installed base satisfaction.

InSight: [PeopleSoft Takes Its Case Directly to the CEO](#)

May 2002	e-Business and Enterprise Applications	David Alschuler
----------	--	-----------------

This *InSight* reviews key themes of PeopleSoft's recent Leadership Summit, and it demonstrates that the company continues to execute in the three areas that really count: product development, marketing, and customer satisfaction.

InSight: [Where Financial Processes and Technologies Stand: The Enterprise Reality](#)

May 2002	Financial Value Chain Management	Andrei Arkhipov
----------	----------------------------------	-----------------

This *InSight* presents Aberdeen's relevant data and analysis following on a recent survey of end-user enterprises and financial institutions; the document helps educate end-users in making smarter technology buying decisions and helps technology providers market their products more effectively.

InSight: [One Size Fits All: the Quest for a Common Language](#)

May 2002	Business Process Management	Darcy Fowkes
----------	-----------------------------	--------------

This *InSight* outlines how Business Process Modeling (BPM) helps leverages an organization's existing IT infrastructure, bridges the gap between this environment and emerging B-to-B collaboration protocols, and provides ongoing incremental value and savings.

InSight: [From the Sell-Side Looking in, Part 2: Making Sense of the Channel Conundrum](#)

May 2002	e-Business	Kent Allen
----------	------------	------------

In this *InSight*, Aberdeen's sell-side practice analyzes the recent re-emergence of "Partner Relationship Management (PRM)" technologies - and the future structure of selling enterprise's direct and indirect sales channels.

InSight: [From the Sell-Side Looking in, Part 1: Making Sense of the CRM Jungle](#)

May 2002	e-Business	Kent Allen
----------	------------	------------

This *InSight* offers one perspective on why "classic CRM" solutions are increasingly in the return-on-investment (ROI) crosshairs.

InSight: [Microsoft Great Plains Convergence: The Road to .NET for Business Applications](#)

April 2002	Enterprise Applications	Katherine Jones
------------	-------------------------	-----------------

This *InSight* provides an overview of the upgrades announced at the Microsoft Great Plains Convergence user group conference and suggests several questions users should consider before deploying the new MS CRM and .NET offerings.

InSight: [WiFi-x Suppliers to Face Continuing Challenges](#)

April 2002	Semiconductors	Russ Craig
------------	----------------	------------

This *InSight*, the third in a three-part series, examines the longer term technology challenges facing WiFi-x suppliers as the industry consolidates, with a goal of helping them shape future development strategies.

InSight: [Achieving Differentiated WiFi-x IC Offerings](#)

April 2002	Semiconductors	Russ Craig
------------	----------------	------------

This *InSight*, the second of a three-part series, provides a list of WiFi-x chip set characteristics - segmented into eight areas of differentiation - to help system designers and decision-makers select the most appropriate offerings as they hit the market.

InSight: [Only Focused WiFi-x IC Suppliers Will Prosper](#)

April 2002	Semiconductors	Russ Craig
------------	----------------	------------

This *InSight*, the first in a three-part series, outlines the challenges facing 802.11 standard (WiFi-x) chip suppliers and a prescription for how to gain the attention of OEMs.

InSight: [The Application-Driven Carrier: Generating Network Traffic with Software](#)

April 2002	NextGen Communications	George Peabody
------------	------------------------	----------------

This Aberdeen *InSight* examines the Application-Driven Carrier model and identifies two carriers, CMN Networks and Dialout.Net, that have employed the model successfully.

InSight: [Human Capital Management Lessons from September 11th: Planning for the Unthinkable](#)

April 2002	Enterprise Applications	Katherine Jones
------------	-------------------------	-----------------

This *InSight* reviews lessons that human capital managers learned in general and the implications for current and future technology.

InSight: [HP's Consumer PC Business Will Shrink](#)

March 2002	Personal Information Technology	Peter Kastner
------------	---------------------------------	---------------

This Aberdeen *InSight* examines how post-merger HP is likely to fare in the business and retail/consumer PC market.

InSight: [Modular Architectures: A New Era for Best-of-Breed CRM?](#)

March 2002	Customer Relationship Management	Denis Pombriant
------------	----------------------------------	-----------------

In this *InSight*, Aberdeen discusses how best of breed vendors and vendors that offer integrated suites will adjust to take advantage of platforms that ease deployment and maintenance of multi-vendor CRM applications.

InSight: [Second-Generation PDAs: It's High Time for Wireless](#)

March 2002	Personal IT	Isaac Ro
------------	-------------	----------

In this *InSight*, Aberdeen reviews the latest wireless devices and highlights the impending arrival of packaged enterprise mobility solutions.

InSight: [Employee Relationship Management: Siebel Enters New Domain with HCM Applications](#)

March 2002	Enterprise Applications	Katherine Jones
------------	-------------------------	-----------------

In this *InSight*, Aberdeen discusses whether Employee Relationship Management (ERM) is a new software solution category, or just another name for Human Capital Management (HCM) applications.

InSight: [Total Cost Management: Your Next Procurement Strategy](#)

March 2002	Supply Chain Management	Tim Minahan
------------	-------------------------	-------------

This *InSight* explains why procurement and Supply Chain Management are at the forefront of strategic corporate initiatives; documents the changing role of the purchasing function within the enterprise; defines Aberdeen's Total Cost Management (TCM) framework; and quantifies the cost, process, and strategic benefits that enterprises can expect from TCM.

InSight: [The Linux Standard Base: How Will It Benefit Linux?](#)

March 2002	Linux, Open Source Software, and Unix	Bill Claybrook
This <i>InSight</i> gives a preview of the emerging Linux Standard Base (LSB) and outlines the benefits associated with deploying LSB-compliant software.		
<i>InSight:</i> Microsoft Enters CRM Market with MS CRM: Opportunity or Threat?		
March 2002	Customer Relationship Management	Chris Fletcher
Targeted at the small and mid-range CRM market, MS CRM - the focus of this Aberdeen <i>InSight</i> - will closely resemble, and integrate with, the Microsoft Office Suite and core Microsoft technologies, including .NET and SQL Server.		
<i>InSight:</i> Using Positive Feedback Loops to Sell CRM		
February 2002	Customer Relationship Management	Denis Pombriant
This Aberdeen <i>InSight</i> introduces the concept of using a bi-polar survey of customer satisfaction and return on investment (ROI) on a discrete cross-section of the customer base to gain a more complete understanding of how well a vendor is meeting both the short and long-term needs of its customers.		
<i>InSight:</i> Linux-Based Software Management Solutions: An Emerging Revenue Stream for Large and Small Companies		
February 2002	Linux, Open Source Software, and Unix	Bill Claybrook
This Aberdeen <i>InSight</i> examines why Linux software management solutions are different than proprietary solutions, who the primary suppliers are, and what the solutions offer users.		
<i>InSight:</i> Through the Analytical CRM Looking Glass: Customer Behavior Analytics		
February 2002	Internet Analytics	Guy Creese
This Aberdeen <i>InSight</i> defines Customer Behavior Analytics (CBA), profiles three CBA vendors, and lists the market drivers that are creating this emerging sector.		
<i>InSight:</i> Wi-Fi's New Standard: 802.11a Will Offer the Best Bandwidth for the Buck		
January 2002	Personal IT	Isaac Ro and Peter Kastner
This Aberdeen <i>InSight</i> explains the development of the Wi-Fi 802.11a standard, outlines its benefits and costs, and highlights an opportunity for smart hardware vendors to deliver tomorrow's standard today.		
<i>InSight:</i> Microsoft and Security: A Broader Perspective		
January 2002	Security	Jim Hurley
Microsoft - the focus of this Aberdeen <i>InSight</i> - seems to be everyone's favorite whipping boy of late, especially when it comes to security holes and vulnerabilities being found in its products.		
<i>InSight:</i> CIO's Reveal Their Top Application Investment Priorities for 2002		
January 2002	Private Equity Services	David Wright, Wyeth Lynch, and James Tsai
Aberdeen's Technology Forecasting Consortium (TFC) finds that infrastructure investments will be the common focus for technology executives' budgeting priorities for 2002.		
<i>InSight:</i> Will WideSky Help EMC Morph from Caterpillar to Butterfly?		
December 2001	Storage and Storage Management	Dan Tanner
This Aberdeen <i>InSight</i> discusses the business impacts of EMC's WideSky initiative, which lets EMC storage software run other vendors' hardware - and may help EMC morph into a software company.		
<i>InSight:</i> The Phoenix Rises: Baan Is Back and Spreading Its Wings		
December 2001	e-Business	Katherine Jones
This Aberdeen <i>InSight</i> examines how Baan, an Invensys Company, financially turned itself around and appears to be on sound financial footing.		
<i>InSight:</i> Another British Invasion? C&W Snags Exodus		
December 2001	Carrier and Enterprise Communications	Dana Tardelli
In this <i>InSight</i> , Aberdeen outlines U.K.-based Cable & Wireless (C&W) \$850 million bid to acquire the majority of assets from former hosting king - but now bankrupt - Exodus Communications.		
<i>InSight:</i> Compaq Tru64 Unix and Oracle9i Clusters Combine to Reduce Costs: Can SAP Resist This Fit?		
December 2001	e-Business and Enterprise Applications	Robert Dorin
In this <i>InSight</i> , Aberdeen discusses why SAP should enthusiastically support Oracle9i and the Compaq/Oracle technology partnership.		
<i>InSight:</i> Early Results: Technology Forecasting Consortium Members Identify IT Spending Hotspots		

December 2001	e-Business	Ed Black
While the full tale of the tape is not yet known, preliminary analysis, presented in this Aberdeen <i>InSight</i> , is yielding some telling results — despite the downturn, customers, security, and software infrastructure are all driving spending.		
<i>InSight: DSO, Anthrax, and the Hardening of Postal Arteries: Is It Finally Time for e-Billing and Payment?</i>		
December 2001	e-Business	Andrei V. Arkhipov and David M. Alschuler
In this <i>InSight</i> , Aberdeen discusses why there will likely be increased appeal for Electronic Bill and Invoice Presentment and e-Payment technologies in the near term.		
<i>InSight: Why Many ASPs Will Become ex-SPs</i>		
November 2001	Application Service Providers	Lew Hollerbach
This <i>Aberdeen InSight</i> examines how a significant majority of application service providers (ASPs) will be seeking additional rounds of funding in the coming months.		
<i>InSight: Enterprise `Hay Day' on the Prairie: Microsoft Great Plains a Tornado to Be Reckoned with</i>		
October 2001	Enterprise Applications	Katherine Jones
As detailed in this <i>InSight</i> , Aberdeen sees widening product breadth, international growth, up-market movement in enterprise sales, and quite likely a new contender in the mid-market CRM arena.		
<i>InSight: Outsourcing Customer Care: Showcase for Competency, Buffer from Complexity</i>		
October 2001	Customer Relationship Management	Chris Martins
This Aberdeen <i>InSight</i> makes a case for Customer Interaction Management (CIM) outsourcing as a savvy deployment approach to customer management strategies in today's uncertain business climate.		
<i>InSight: Living with Windows XP Media Player and Wireless Support</i>		
October 2001	Enterprise Applications	Peter Kastner
In this <i>InSight</i> , Aberdeen details why we believe almost all previous Windows users are going to enjoy living with Windows XP.		
<i>InSight: Upgrading to Windows XP: A Long and Winding Road</i>		
October 2001	Enterprise Applications	Peter Kastner
In this <i>InSight</i> , Aberdeen examines the long-anticipated launch of Microsoft's Windows XP operating system.		
<i>InSights: HP's Acquisition of Compaq: Beyond the Naysayers, the Promise and the Opportunity</i>		
November 2001	HP Acquisition of Compaq	Various
Aberdeen Closely Examines the Acquisition from Multiple Industry, Customer, and Competitive Perspectives		
<i>InSight: Is Linux Domination of the High-Performance-Computing (HPC) Marketplace Imminent?</i>		
November 2001	Linux and Open Source Software	Bill Claybrook
This <i>InSight</i> examines the HPC marketplace for Linux, and it outlines multiple reasons why Linux will be a successful alternative to proprietary systems in HPC.		
<i>InSight: Post-Hype: A New Phase in the Evolution of the Optical Circuits Industry</i>		
October 2001	Carrier and Enterprise Communications	Esme' Fantozzi
This <i>InSight</i> details the qualifying factors that must take place in the evolution of PLCs from sample quantity production into the large-scale manufacturing mainstream.		
<i>InSight: Cable Operators May Lose the Triple Crown</i>		
October 2001	Carrier and Enterprise Communications	George Peabody
This Aberdeen InSight offers some suggestions for getting the multiple system operators (MSOs) on track.		
<i>InSight: The Second Coming of Netmarkets</i>		
October 2001	e-Business - Netmarkets	Bill Brandel
This <i>InSight</i> reflects Aberdeen Group's Net Markets best practices, and draws on Aberdeen's framework for measuring liquidity to determine the leaders in this market segment.		
<i>InSight: i2 Gets Its Assets in Gear</i>		
October 2001	e-Business	Tim Minahan

This *InSight* reflects Aberdeen Group's analysis of i2's solutions and business strategy in light of the current business environment.

InSight: [Virtualization Needs Standards](#)

October 2001	Storage and Storage Management	Dan Tanner
--------------	--------------------------------	------------

Placing attribute information in a storage virtualization standard framework - the benefits of which are detailed in this Aberdeen *InSight* - could allow users to cut storage-administration costs, improve per performance and security, and provide direct file control.

InSight: [Assessing The Damage: Will Fourth Quarter Technology Spending Fall?](#)

September 2001	IT Spending	David Wright
----------------	-------------	--------------

This Aberdeen *InSight* will examine what impact the tragic events of September 11 will have on the economy of the world's 800-pound gorilla?

InSight: [PeopleSoft's Messages Connect with Customers: New Products, Renewed Commitment to Users](#)

September 2001	Enterprise Applications	Katherine Jones
----------------	-------------------------	-----------------

This Aberdeen *InSight* reviews significant PeopleSoft announcements, offers an overview of its new collaborative business planning products, and discusses the benefits of the company's newly bolstered commitment to its customers.

InSight: [Winning the Enterprise: Pocket PC Will Be the Pervasive Handheld Platform by 2005](#)

September 2001	Wireless	Isaac Ro, David Wright, and Christopher Fletcher
----------------	----------	--

In this *InSight*, Aberdeen analyzes market trends and predicts that a far higher rate of adoption across the enterprise will allow Pocket PC to eclipse the Palm OS as the leading handheld platform by 2005.

InSight: [PDAs in the Enterprise: Analyzing Supplier Viability](#)

September 2001	Wireless	Isaac Ro, David Wright, and Christopher Fletcher
----------------	----------	--

In this *InSight*, Aberdeen evaluates the leading vendors in the PDA market from both a product and a supplier-viability perspective using our "Market Positioning Pyramid" (MPP).

InSight: [The Optical Opportunity: A Refractive View of the Present Market - and Its Future](#)

August 2001	Optical Communications	Andy McCormick
-------------	------------------------	----------------

In this *InSight*, Aberdeen examines the existing view of the communications networking market - particularly the intelligent optical networking segment.

InSight: [The HSP Market: Are You Ready for the Shakeup?](#)

August 2001	Carrier & Enterprise Communications	Dana Tardelli
-------------	-------------------------------------	---------------

The hosting services market is at a crossroads. Slow market adoption and fundamental changes in business strategies have opened the door for a reordering of market leadership.

InSight: [Linux Is on the Move - Up!](#)

July 2001	Linux and Open Source Software	Bill Claybrook
-----------	--------------------------------	----------------

This Aberdeen *InSight* argues that Linux will join IBM's z/OS and Microsoft's Windows as the primary server OSs before the end of the decade.

InSight: [Slippery Road Ahead for Internet-Based Energy Service Providers](#)

July 2001	Energy and Communications	Ethan L. Cohen
-----------	---------------------------	----------------

This Aberdeen *InSight* takes a fresh look at the challenges at hand for Internet-based energy service providers (ESPs), and it surveys the current market environment in which the ESPs are operating.

InSight: [e-Health: The Brave New World of Healthcare?](#)

June 2001	e-Healthcare	Alison N. Haughton
-----------	--------------	--------------------

This Aberdeen *InSight* discusses the challenges facing e-Health and the questions investors should be asking.

InSight: [Web-to-Host Faces the 'Survival of the Fittest'](#)

July 2001	Internet Infrastructure	Darcy Fowkes
-----------	-------------------------	--------------

This *InSight* reviews the industry trend and the effects TBI will have on legacy extension suppliers, as well as presents e-Business integration supplier NEON Systems.

InSight: [The Missing Link in B-to-B e-Commerce: Financial Value Chain Management](#)

July 2001	Enterprise Applications	Andrei Arkhipov
-----------	-------------------------	-----------------

This *InSight* examines various aspects of what Aberdeen calls Financial Value Chain Management (FVCM).

<i>InSight:</i> SAP: The Once and Future King		
July 2001	e-Business	David Alschuler, Bill Brandel, Christopher Fletcher and Tim Minahan
The SAP story was compelling at this year's SAPPHERE, leading Aberdeen to believe that this lion isn't quite ready to cede its hegemony.		
<i>InSight:</i> Mobile CRM: Why Wait for Wireless?		
June 2001	Customer Relationship Management	Christopher Fletcher
This <i>InSight</i> evaluates some ready-to-deploy alternatives to wireless enterprise applications, and offers a few options for those who are unwilling to wait for wireless.		
<i>InSight:</i> PeopleSoft Drives a Stake into the CRM Market		
June 2001	Customer Relationship Management	Christopher Fletcher
This Aberdeen <i>InSight</i> discusses PeopleSoft's Leadership Summit 2001 (Las Vegas, NV), and examines the company's commitment to its Customer Relationship Management technologies.		
<i>InSight:</i> Melding NAS with SAN		
June 2001	Storage and Storage Management	Dan Tanner
This Aberdeen <i>InSight</i> summarizes the benefits of NAS and SAN, and it predicts what additional benefits converged NAS and SAN might have. It also examines the approaches vendors are taking to NAS/SAN convergence.		
<i>InSight:</i> Open Source: Tips to Avoid Revenue Tailspin		
June 2001	Open Source Software	Bill Claybrook
Open-source-based companies have failed to realize that open source is a development model - not a business model. This Aberdeen <i>InSight</i> presents a series of tips to avoid a revenue tailspin.		
<i>InSight:</i> e-Healthcare: The de Facto Second Opinion		
May 2001	e-Healthcare	Alison Houghton
This Aberdeen <i>InSight</i> examines the current state of e-Healthcare, and suggests ways to package usable and medically accurate and secure content		
<i>InSight:</i> DoCoMo Delays 3G Deployment: Credibility Issue Shakes Proponents' Faith		
May 2001	Wireless Technologies	Kelly Quinn
This Aberdeen <i>InSight</i> examines if DoCoMo's recent announcement undermines its position as a global wireless leader.		
<i>InSight:</i> Are the Telecom Big Dogs off the Leash?		
May 2001	Carrier and Enterprise Communications	George S. Peabody & Dana J. Tardelli
This Aberdeen <i>InSight</i> raises a big question in the race between two monopolies: What will happen to service excellence and swift deployment?		
<i>InSight:</i> Doing More with Less: Wireless Network Resource Management Software		
May 2001	Wireless Infrastructures	Richard T. White
This Aberdeen <i>InSight</i> provides an overview of NRM, which if implemented today, can generate additional revenues from existing networks while improving customer satisfaction and reducing customer churn.		
<i>InSight:</i> Mend Those `Collaborative Fabric' Holes Before Profitability Unravels		
May 2001	Enterprise Business Applications	Charles J. Mullen
The current economic downturn is causing companies to alter manufacturing schedules, leading to excess inventory and high financial exposure. This Aberdeen <i>InSight</i> proposes three specific suggestions that could help.		
<i>InSight:</i> Bluetooth: Still Green in the Enterprise		
May 2001	Carrier and Enterprise Communications	Nicole Nicas
This Aberdeen <i>InSight</i> answers the question, "Is Bluetooth for the enterprise or the personal user?"		
<i>InSight:</i> True Blue: The Truth About Bluetooth 1.1		
May 2001	Carrier and Enterprise Communications	Nicole Nicas
This Aberdeen <i>InSight</i> examines the role of the IEEE in developing a standard for the Bluetooth 1.1 specification and the possible impact on the much-maligned technology.		
<i>InSight:</i> Infrastructure Ground Zero: Co-Location's Predictable Point of Failure		
March 2001	Outsourcing Infrastructure and Services	Ethan Cohen and Lisa Perri

As loud as the energy crisis is for many technology companies, the lack of power planning is a symptom of a more fundamental failure of co-location providers to adequately address risk and Supply Chain Management issues. This Aberdeen *InSight* addresses the critical role that power plays in the service provider space.

[InSight: Aberdeen Field Experience at Odds with NY Times' View of Computer Associates' Viability](#)

May 2001	Enterprise Systems Management	Valerie O'Connell
----------	-------------------------------	-------------------

The April 29, 2001, *New York Times*' piece on Computer Associates (CA) contains substantive inaccuracies to which Aberdeen can speak from direct field experience. This Aberdeen *InSight* is published in the spirit of fair play with the understanding that - under the right conditions - even an 800-pound gorilla can sometimes be an underdog.

[InSight: Are Predictions of 3G Rollout Delays Just Hype - Or a Global Trend?](#)

April 30, 2001	Wireless Technologies	Kelly Quinn
----------------	-----------------------	-------------

Are the predictions of slowdowns for 3G rollouts merely hype, or do they indicate an emerging trend in the global wireless market?

[InSight: What the Energy Industry Needs Now: Aggressive CRM](#)

April 24, 2001	Energy and Communications	Ethan Cohen and Eileen Joseph
----------------	---------------------------	-------------------------------

This Aberdeen *InSight* shows that implementing e-Commerce and CRM technologies with stronger back-office systems will give energy companies an almost indisputable advantage in the coming battle for consumer loyalty and revenue.

[InSight: dot.bomb Scourge Hits e-Recruitment Suppliers: Dancing on Graves](#)

April 11, 2001	Human Capital Management	Kathryn Welds
----------------	--------------------------	---------------

This Aberdeen *InSight* highlights five factors that will differentiate the winners in the e-Recruitment market.

[InSight: Good Marketing: The Secret to Success for Energy Service Providers](#)

March 28, 2001	Energy and Communications	Eileen Joseph and Ethan Cohen
----------------	---------------------------	-------------------------------

This Aberdeen *InSight* examines the market maturation and deregulation of retail energy provider, as well as the differentiating business models, which can make success in this sector questionable.

[InSight: Getting the 'e' into European Call Centers](#)

March 13, 2001	Customer Relationship Management	Christopher Fletcher
----------------	----------------------------------	----------------------

European customer contact centers today must embrace and support communications via any medium the customer chooses - including telephone, e-mail, and Web-based transactions - and should also provide an architecture flexible enough to accommodate new or emerging channels.

[InSight: Storage Virtualization: It Pays to Be Informed](#)

February 26, 2001	Storage Systems	Dan Tanner
-------------------	-----------------	------------

This Aberdeen *InSight* defines what storage virtualization is; how storage market vendors are implementing it; and how virtualization benefits businesses, thus aiding IT professionals when making important storage management decisions.

[InSight: Locating New Opportunities for Cellular Service Providers](#)

February 21, 2001	Carrier & Enterprise Communications	Nicole M. Nicas
-------------------	-------------------------------------	-----------------

This Aberdeen *InSight* provides an overview of location-based services, which, if implemented today can generate additional revenues from existing networks, improving customer satisfaction and reducing churn.
